

Partitioning a Disk Using Parted

HOWTO

Call parted from the command line as:

```
sudo /sbin/parted /dev/sda
```

Erase the partition table:

```
mklabel gpt
```

Set the units to TB:

```
unit TB
```

Make a ext2 partition:

```
mkpart primary ext2 0.00TB 4.00TB
```

Print the partition table:

```
print
```

Exit parted:

```
quit
```

Format the partition:

```
mkfs -t ext2 /dev/sda1
```
